Pulteney Cruisers Ltd. – Passenger Counting Instructions

Introduction

Passenger counting numbers are stored on a company MYSQL database.

Trips are recorded with a GMT date and timestamp using simple two character codes shown below.

Site Codes		Boat Codes	
PW	Pulteney Weir	S2	Scenic 2
BS	Boating Station	SW	Sir William Pulteney
ВН	Bathampton	AM	Avon Monarch

Passenger Count Input

Passenger Numbers are input from any Internet Equipped mobile phone.

The URL link for input is http://www.lavistest.com/PassSys/PassSend.html

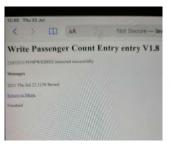

This can be reached either by typing in the above URL or navigating from lavistest.com to "level system" and then clicking on link "Insert Passenger Numbers on Internet". Alternatively the QR code at the end of this document can be used.

This link will give a screen as shown below:

K > III AN tool Secure - Invident core	¢ () +
Pulteney Weir	
Scenic2	
on 00 off 00 Crew 02	
Send	
Sec. 2 Subsection Statement	

The panel has drop down boxes that allow the panel to be configured for each trip.

When the correct input has been selected the "send" button is clicked.

If input has been sent correctly this acknowledgment screen will be received.

If this is not received phone coverage should be checked and the entry process repeated.

If passengers are loaded just before casting off a new entry should be made.

Pulteney Cruisers Ltd.

Output

Passenger numbers can be checked to ensure they are correctly recorded or for any other purpose using the following URL:

http://www.lavistest.com/PassSys/PassDisplayList.php

This can also be navigated to as described above but by finally clicking on "List Passenger Counting".

Output is as shewn below:
